HOMOGENIZED MARINE GRAVITY MAPS OF SOUTHERN AND EASTERN BALTIC SEA FOR MODERN 3D APPLICATIONS IN MARINE GEODESY, GEOLOGY AND NAVIGATION

The project BalMarGrav harmonises data on the Earth's gravity across the region to feed it into a new height reference system for safer navigation, offshore infrastructure and sea traffic management.

This #MadeWithInterreg project helps drive the transition to a green and resilient Baltic Sea region.

Organisations from the following countries cooperate together to make that happen:

Germany, Poland, Latvia, Lithuania, Estonia, Finland, Denmark, Sweden
